

[YOUR TALK TITLE]

[YOUR NAME] ([YOUR INSTITUTION])

[VENUE], [MONTH YEAR]

This Version: October 5, 2026

[YOUR EMAIL]

A frame title is a plain topic or a full sentence stating the finding

Source: name the archive, dataset, or paper

- The image column is 38 percent of the text width and the text column is 56 percent.
- An empty `\item[]` adds vertical space between bullets.
- **Key terms** are bold muted blue.
Warnings are bold muted red.
Secondary text is gray.

Evidence

The figure frame gives one figure the full width

The caption is small and gray. State what is plotted, the sample, and the source.

A plain frame for a figure that needs the whole slide. The caption states what the audience is looking at.

Two images side by side with a colored label above each

Before

One line saying what this image shows

After

One line saying what this image shows

Tables use booktabs rules and no vertical lines

	(1)	(2)
	Outcome A	Outcome B
Treatment	0.023 (0.008)	0.041 (0.015)
Unit fixed effects	Yes	Yes
Year fixed effects	Yes	Yes
Observations	1,884	1,884

Standard errors in parentheses, clustered by unit. Write thousands with a thin separator, as in 1,884.

The keybox holds the one takeaway of a frame

- State the result in plain language and give its magnitude in units the audience can interpret.
- A one-unit increase in the treatment is associated with a **0.5 standard deviation** increase in the outcome.

Use at most one box on a frame, and on few frames. Most frames need none.
